

THE PLAYBOOK / GENESIS CRM

Sales Pitch Guide

How to position, price, and close Genesis CRM — whether you're selling it as your CRM or reselling it under your brand.

GENESIS

Done-for-you CRM, built to convert.

genesisx.space

Why Genesis exists

Most CRMs are bloated, expensive, and abandoned within 90 days. Sales teams want fewer fields and more closed deals. Founders want fewer tools and more revenue. Genesis is the CRM that gets out of the way — done-for-you, AI-powered, and ready to resell under your brand.

The one-line pitch

“Genesis is a done-for-you CRM that runs your pipeline, drafts your emails, and books your meetings — so you can stop managing software and start closing deals.”

Who we sell to

Two clear audiences. Two different conversations.

Operators Need a CRM	Solo founders, sales teams, and SMBs that want a CRM that <i>just works</i> . They don't want to configure pipelines or write Zapier flows. They want to log in and see their next 5 calls.
Resellers Want to white-label	Agencies, consultants, and SaaS founders who want to sell a branded CRM without building one. They keep the customer relationship and the margin; we handle the platform.

01 THE DISCOVERY CALL

Open with a frame, not a feature

Don't open with "Let me show you the dashboard." Open by diagnosing where their revenue is leaking. The pitch sells itself once they see the gap.

Five questions to ask in the first 10 minutes

- Where do leads come from today, and where do they go to die?
- How many follow-ups does a lead get before they convert — or you give up?
- Who on the team owns response time, and how is it measured?
- What's the cost of one missed deal this quarter?
- If your CRM disappeared tomorrow, what would actually break?

Listen for these triggers

"We're using spreadsheets." — Starter / Growth fit.

"We pay for HubSpot but no one uses it." — Pro CRM fit.

"My clients keep asking for a CRM." — White-label fit.

"Our process is unique." — Custom Build fit.

Demo flow (under 12 minutes)

1. Inbox triage (2 min)

Show how AI reads inbound replies and ranks them by intent.

2. Pipeline view (3 min)

Drag a deal through stages. Show automation triggers firing.

3. Auto-outreach (3 min)

Show how a lead gets a personalized cadence with zero clicks.

4. Reporting (2 min)

Open the Revenue dashboard. Show MRR, conversion, and cohort views.

5. The close (2 min)

Recap their three biggest pains. Show which plan solves each.

02 PRICING & POSITIONING

How to present pricing

Always anchor on the cost of *not* having a CRM. One missed deal usually exceeds a year of Pro. Then present three options — never one — and let them self-select.

PLAN	PRICE	BEST FOR	KEY FEATURES
Starter CRM	\$39/mo	Solo founders & freelancers	Pipeline, contacts, email, 1 user
Growth CRM	\$89/mo	Small teams closing deals	Automation, 5 users, integrations, AI assist
Pro CRM	\$179/mo	Scaling teams	Unlimited users, advanced AI, priority
White-Label	from \$249/mo	Agencies & resellers	Your brand, domain, logo, billing
Custom Build	from \$10K	Enterprises with unique workflows	Bespoke modules, integrations, SLAs

The setup-fee conversation

Setup fees cover onboarding, data migration, and configuration. Frame them as “a one-time investment so you never touch a settings panel.” Invoice separately after the discovery call — never at checkout.

White-label economics in one slide

YOUR PRICE TO CLIENT	GENESIS COST	YOUR MARGIN
\$249 / mo	\$89 / mo	\$160 / mo per client
\$499 / mo	\$179 / mo	\$320 / mo per client
\$999 / mo	\$249 / mo	\$750 / mo per client

Ten white-label clients on a \$499 plan = **\$3,200/mo recurring** with no engineering team.

03 OBJECTION HANDLING

Common pushbacks — and what to say

Every objection is a request for more information. Acknowledge, reframe, and move forward.

OBJECTION	RESPONSE
“It’s too expensive.”	Compare to one missed deal. The Growth plan pays for itself with a single closed lead per month.
“We already use HubSpot/Salesforce.”	Genesis is done-for-you. We set it up, run it, and tune it. You spend zero hours configuring.
“We don’t need AI.”	AI doesn’t replace your team — it triages your inbox, drafts replies, and surfaces hot leads and opportunities.
“What about data ownership?”	You own everything. Export anytime. White-label clients run on isolated workspaces.
“Can we cancel?”	Month-to-month. Cancel anytime from Billing. No annual lock-in unless you want a discount.

The takeaway close

If a prospect stalls after the demo, use the takeaway: “Honestly, if you’re not losing deals to slow follow-up right now, Genesis isn’t the right fit yet. Should we revisit in 90 days?”

Nine times out of ten they’ll re-engage on the spot — because **they are** losing those deals.

04 CLOSING & NEXT STEPS

The 24-hour close playbook

After the demo, do these four things within 24 hours. Closes inside this window convert at roughly 3× the rate of week-old follow-ups.

- Send a 90-second Loom recap that names their *specific* pain points.
- Attach this guide and a checkout link for the recommended plan.
- Offer one calendar slot in the next 48 hours — not a booking link.
- Promise a hand-built migration plan if they sign before the call.

Your one-page summary

1. Anchor on the cost of doing nothing.
2. Present three options — let them self-select.
3. Sell the operator on time saved; sell the reseller on margin earned.
4. Always close with a calendar slot, not a link.

Need help on a live deal?

Email support@genesix.space with the prospect's name and the stage they're stuck at. We'll send back a tailored response within one business day.

Built by Genesis — the done-for-you CRM. Pitch hard. Close harder.
